

Climate Detectives

**A free,
hands-on, one-
day workshop for
5th-12th grade teachers**

**Substitute Reimbursement
Breakfast and Lunch Provided**

**Hands-on Kits and
Materials Provided**

**Professional Development
Credit Available**

Your students will be motivated to learn about the energy-climate connection when they become Climate Detectives. Students learn about the science of climate change and how to reduce energy consumption through this hands-on program correlated to New York's Learning Standards. Attendees receive hands-on kits and materials and their students receive take-home energy conservation kits.

The Niagara Power Project's Power Vista

Lewiston | October 19th | 8:00 a.m. to 3:30 p.m.

Hosted by the New York Power Authority

TO REGISTER, go to www.regonline.com/needlewiston10

West Seneca CSD District Offices

West Seneca | November 3rd | 8:00 a.m. to 3:30 p.m.

Delivered in cooperation with West Seneca CSD

TO REGISTER, go to www.regonline.com/needwestseneca10

Workshop Topics

ENERGY SOURCES: Activities that teach about where our energy comes from and how it affects our economy and environment.

CARBON CYCLE: Simulation activities that show how carbon cycles through earth's reservoirs and how this cycle has changed through time.

CAUSES OF CLIMATE CHANGE: How our atmosphere works and how greenhouse gas emissions are affecting it.

ADDRESSING CLIMATE CHANGE: Students engage in problem-solving activities that examine ways to reduce our contribution to climate change.

SAVING ENERGY AT HOME: Your students will be provided with materials to study energy use at home, reduce their carbon footprint, and lower energy bills.

FREE CLASSROOM KITS!

To be eligible, your school must be located in National Fuel's service territory.
